

Transformă-ți fereastra într-o grădină! Cu acest ghid de bricolaj îți crezi propria mini-grădină. Ia foarfeca, lipiciul și culorile și creează o decorațiune colorată pentru pervaz!

De ce ai nevoie:

- Borcane sau cutii de carton de băuturi (de ex. cutie de lapte sau de suc) pe post de ghivece
- Lipici stick
- Foarfecă
- Carton
- Creioane sau vopsea și pensulă
- Capsator
- Pământ și semințe pentru semănat

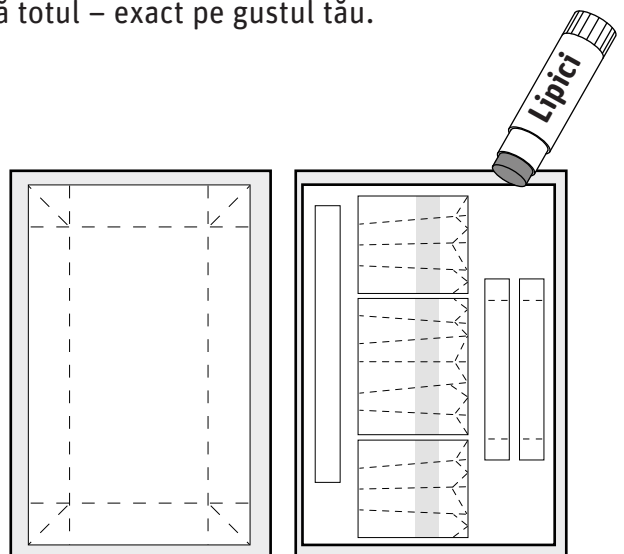

Și iată cum se face:

1. Printează și decupează șablonul: Printează șabloanele de bricolaj.

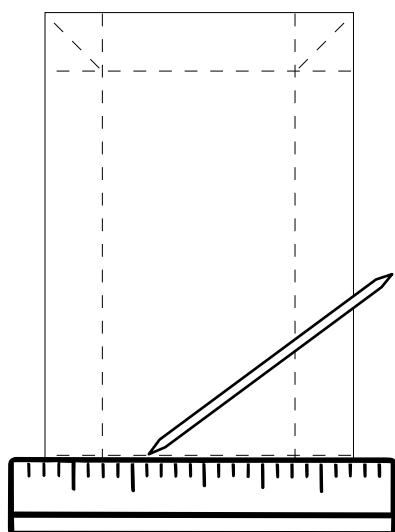

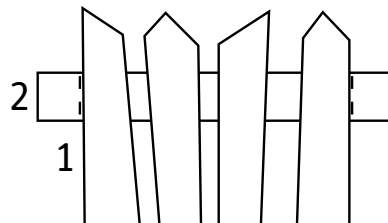

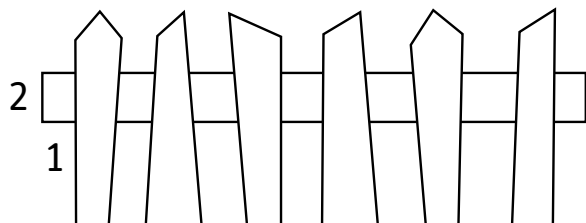

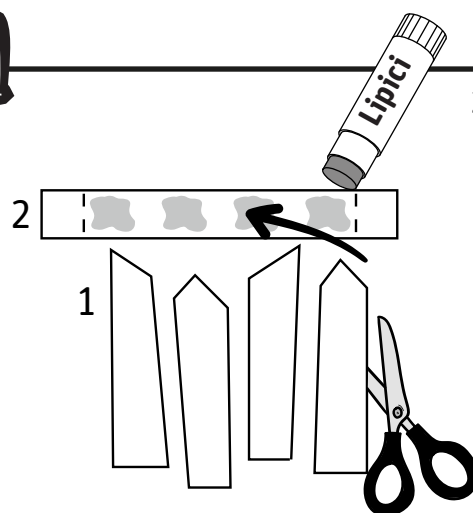

2. Colorează șablonul: Acum intră culoarea în joc! Colorează totul – exact pe gustul tău.

3. Lipește planșele: Lipește paginile 4 și 5 pe carton. Apoi decupează toate piesele.

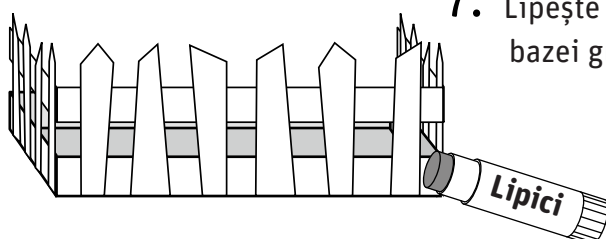

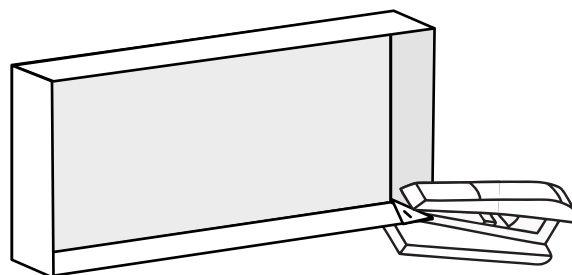

4. Decupează gardul: Pentru gard, decupezi piesele pe liniile punctate și lipești elementele de gard (1) peste elementele de gard (2).

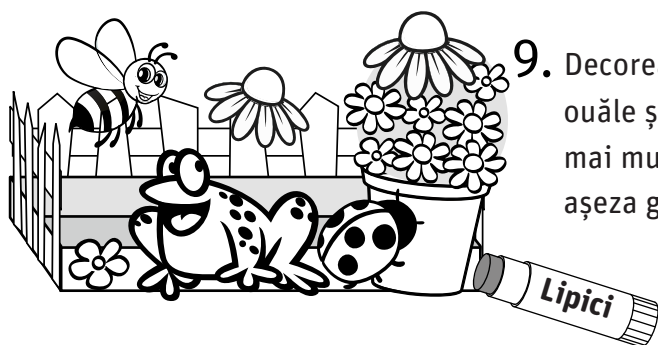

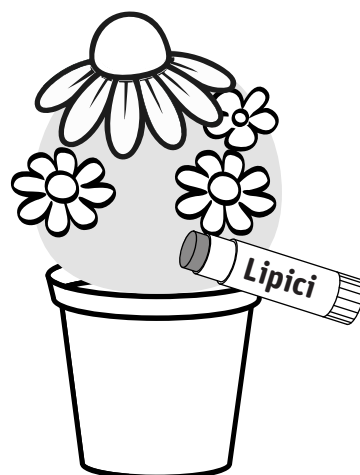

5. Trasează liniile: Ia o riglă și un bețișor de lemn (de ex. o frigăruie). Cu ele poți zgâria ușor liniile întrerupte – așa se îndoaie mai bine.

6. Îndoaie baza: Acum îndoi baza grădinii de fereastră. Pliază colțurile spre interior și prinde-le cu capsatorul.

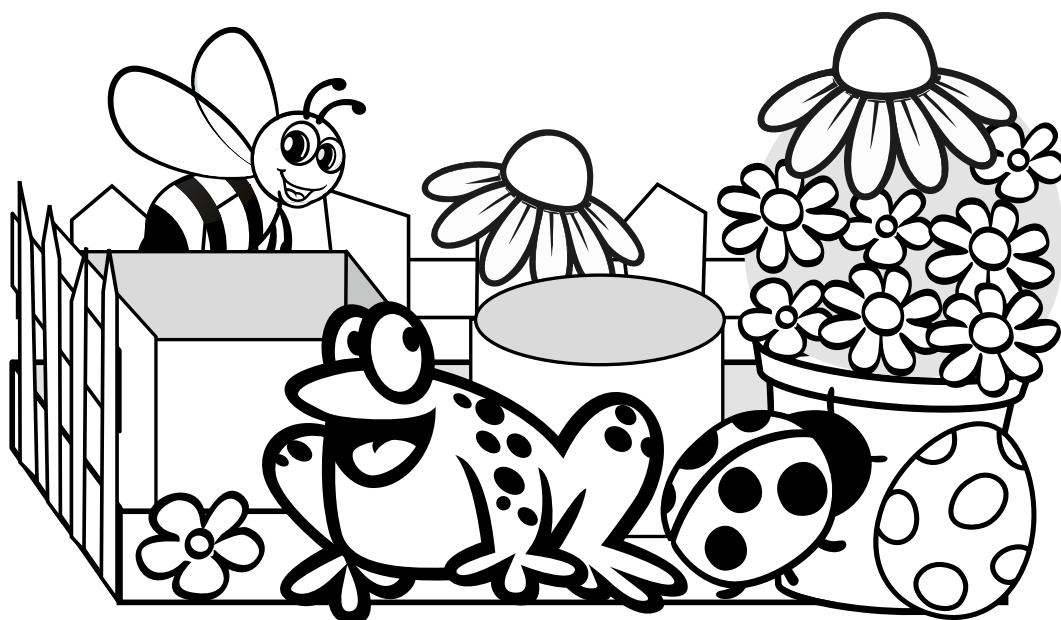

7. Lipește gardul: Lipește gardul pe marginile bazei grădinii.

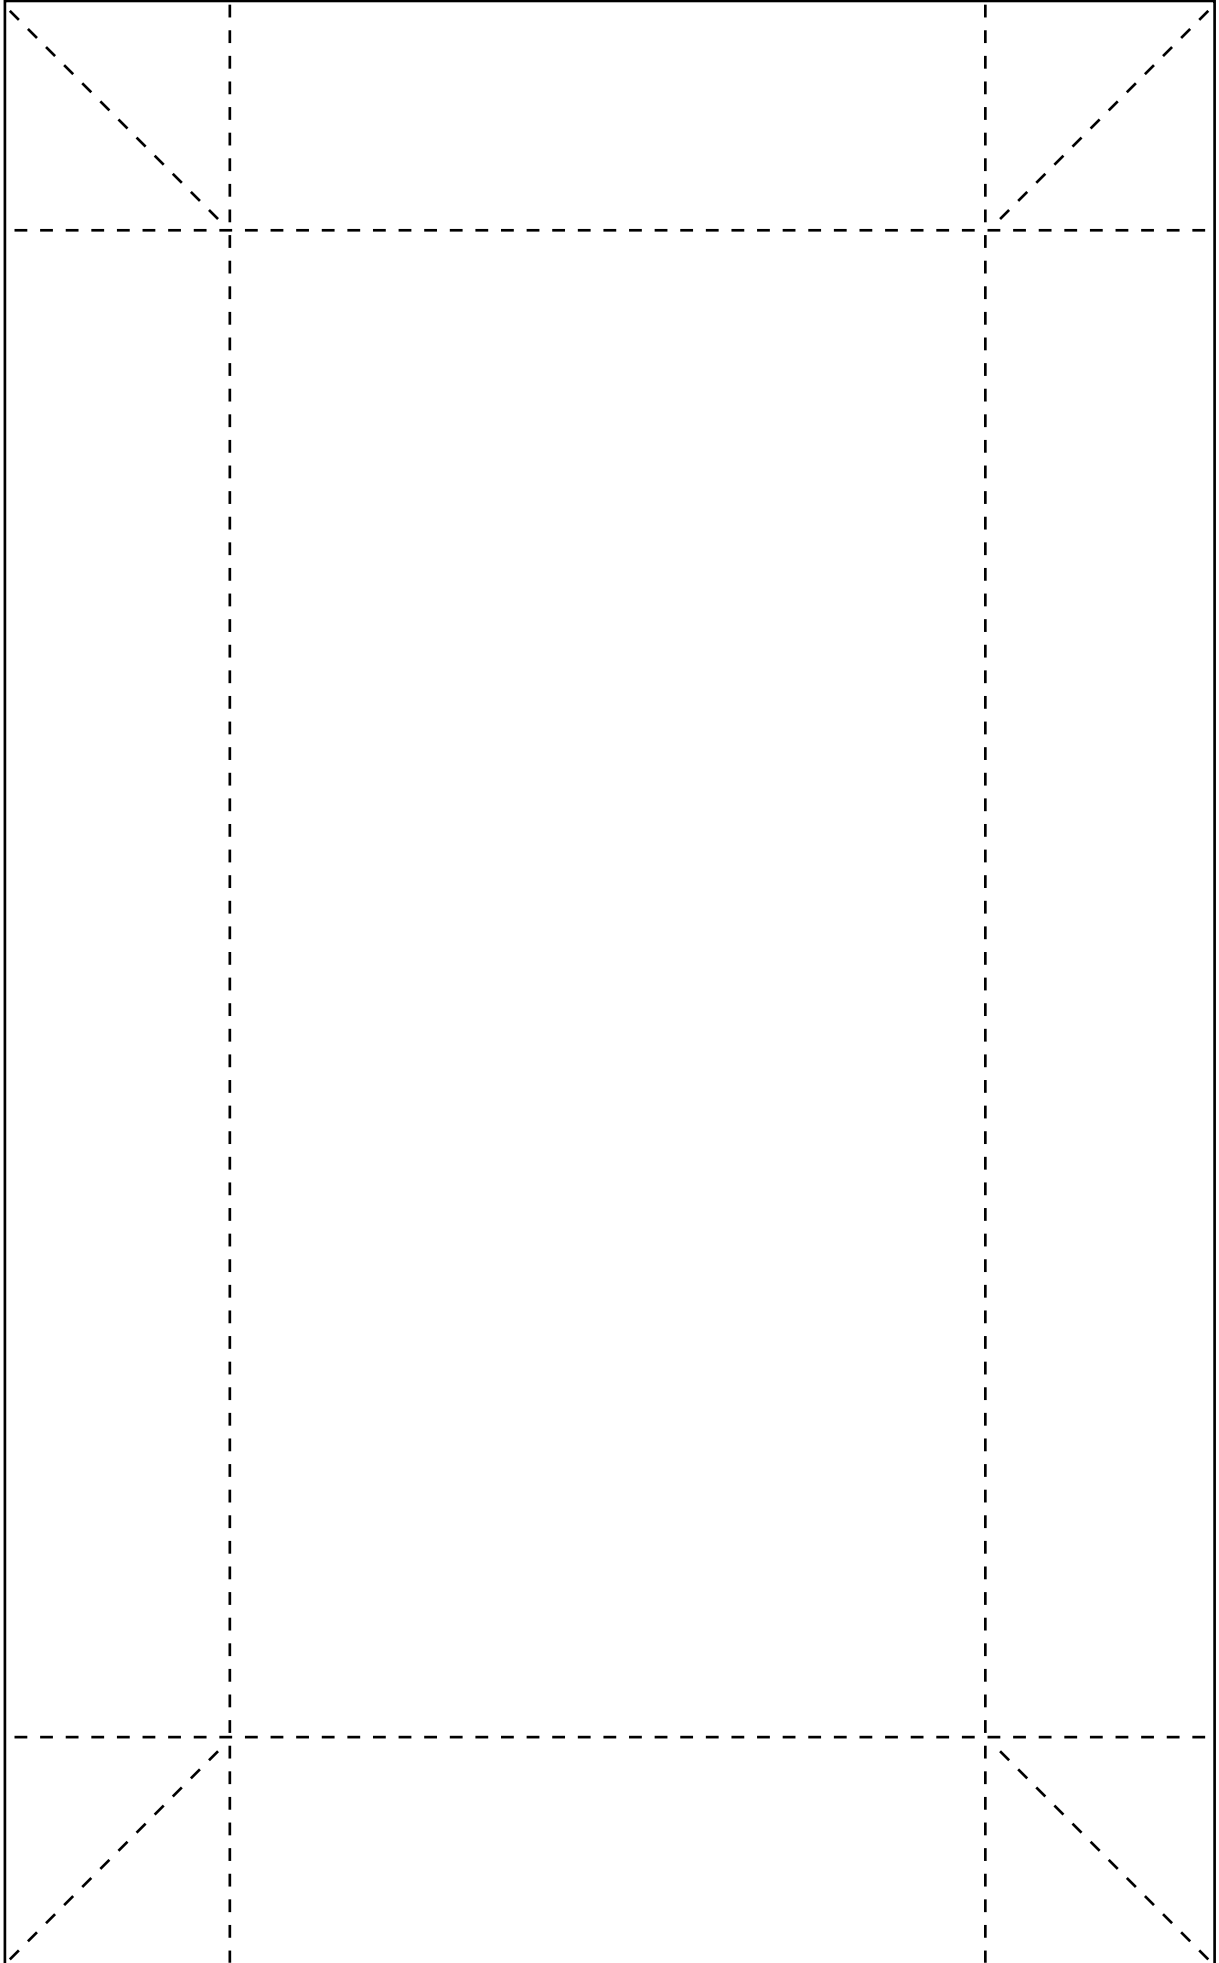

8. Decorează ghiveciul: Acum poți decora! Împodobește ghiveciul de la pagina 6 cu câte flori vrei. Lipește-le pe suprafața gri.

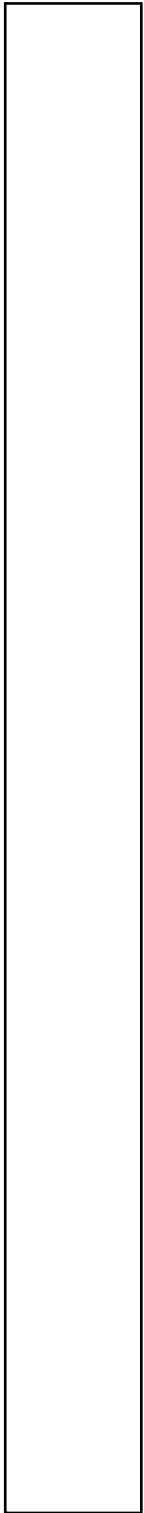

9. Decorează: Albinuța, broscuța, fluturele, buburuza, ouăle și florile le poți lipi acolo unde îți place cel mai mult. Grădina ta de fereastră este gata și poți așeza ghivecele înăuntru și le poți planta.

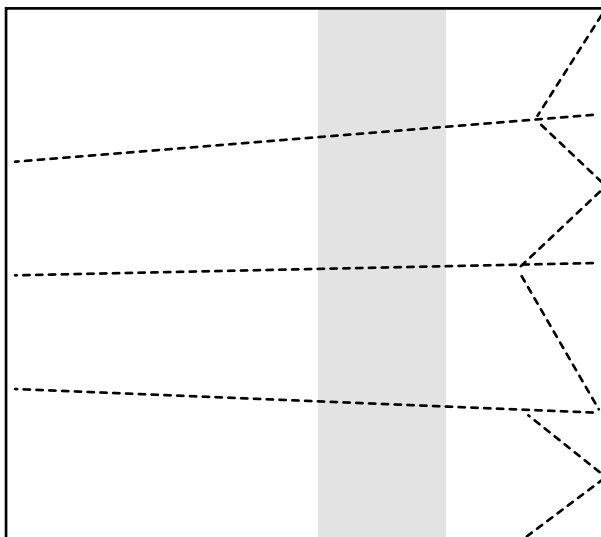

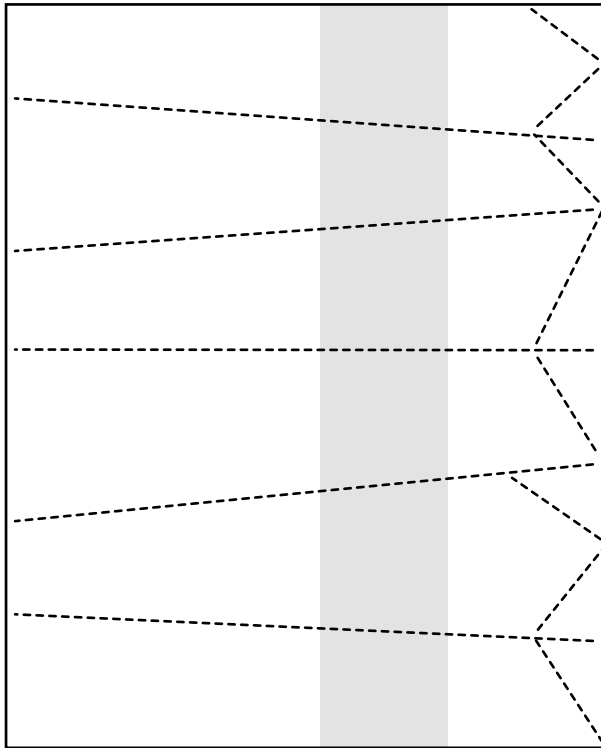

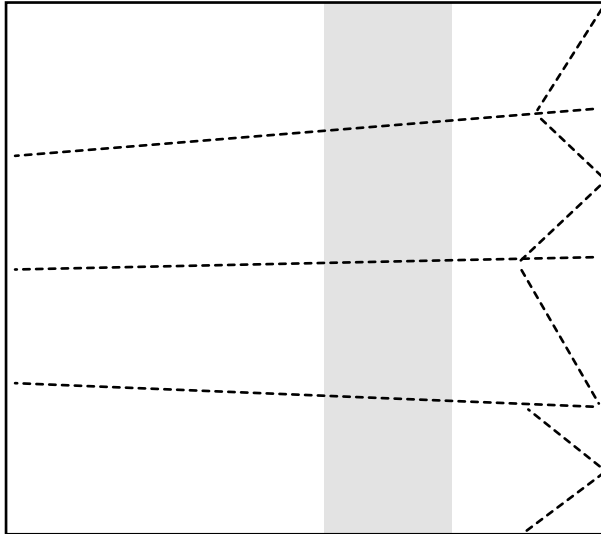

Dein Fenstergarten ist fertig und du
